

Manage and protect your devices, your apps, and your users

Endpoint Management Workshop

Workshop highlights

Improve your Microsoft Secure Score with Microsoft Endpoint Manager

Learn how to build management policies that protect your users, company data, and devices

Gain insights about your users' endpoints and their compliance with your IT policies

Determine the best way to give your users access to the apps they need on the devices of their choosing "Modern device management encompasses a wide range of areas including user protection, adding/removing devices, managed applications, end user support, and rolling out new capabilities."

—Forrester 2020 Microsoft 365 Enterprise Total Economic Impact Study

How are you managing your mobile devices, laptops, and other user endpoints? Do you know if your user's devices are compliant with your IT policies?

Enable users to be productive, on any device, without compromising IT security

Today's users are looking for more ways to remain productive while working on any device. 95% of organisations allow personal devices in the workspace. All these devices add additional risks, when you consider that 70 million smartphones are lost every year.

With users asking for more ways to work the way that they want, this workshop will show you how to manage both company-owned and user-chosen devices in the cloud.

Why you should attend

Experience the power of modern device management within your own environment.

This workshop will show you how to leverage intelligent security, risk-based controls, zero-touch provisioning, advanced analytics, and deep integration to the Microsoft products you already use. By attending, you can:

Learn how to improve your management capabilities with Microsoft Endpoint Manager.

Discover and protect your endpoints by enforcing policies and deploying security tools.

Secure your users' identities with multi-factor authentication and conditional access from any device.

Enable your users to be productive with the applications they need, on the devices they want.

What to expect

Get an executive deep dive into remote deployment, management, and the security of corporate and BYOD devices in your organisation. Our goal is to show you the best ways to manage endpoints at the enterprise level. We'll provide you with the ability to protect your authorised users' identities so you can authenticate credentials and manage access while still giving users the freedom to collaborate with others.

We'll work with you to:

- Learn how to improve your management capabilities with Microsoft Endpoint Manager
- Discover and protect your endpoints by enforcing policies and deploying security tools
- Secure your identities with multi-factor authentication and conditional access from any device
- Enable your users to be productive with the applications they need, on the devices they want

We'll customise the workshop based on your organisation's needs

Engagement set up

_ Microsoft Endpoint Manager

Baseline security

_ Device configuration and management

Design and planning

Customer value conversation

Discovery session for endpoints

Key results, recommendations and next steps

Who should attend

The workshop is intended for security decision-makers such as:

- Chief Information Security Officer (CISO)
- Chief Information Officer (CIO)
- Chief Security Officer (CSO)
- Endpoint & Device Management owners/decision makers

- Application business owners
- IT Security
- IT Operations
- Security Architect
- Security Engineers

Why CPS?

As a Microsoft Gold Partner, CPS works hand in hand with Microsoft to deliver expertise for device management strategies and security posture when you need it, as part of your identity and access management.

That is how we extract maximum benefit from Microsoft 365 and ensure a more secure environment for your organisation and employees. CPS has the expertise to support your Modern Endpoint Management deployment using Microsoft 365 technologies. Our team of consultants, architects and project managers work with you to envision a secure modern workplace where your employees are empowered to work from anywhere, across devices, in a compliant, trusted and secure manner.
