

# Employee Experience and Microsoft Viva

Microsoft Viva, powered by Microsoft 365, is a platform built to support the digital aspects of the employee experience, bringing together knowledge, learning, resources and insights. Viva allows for a people-first culture, enabling individuals and teams to work at their very best, wherever they are located.

## Microsoft Viva Insights

Viva Insights delivers personalised and actionable privacy protected insights that help everyone in an organisation to thrive; boosting productivity and prioritising well-being. Viva Insights helps individuals, managers and leadership teams understand and implement change through data-driven insights.

## Microsoft Viva Topics

Viva Topics enables you to turn and organise content into usable knowledge and expertise to suit the different teams within your business. Consider Viva Topics as similar to Wikipedia for your organisation.

## Microsoft Viva Connections

Built on your SharePoint Online Intranet, Viva Connections gives everyone a curated, company-branded experience that brings together relevant news, conversations, and other resources.

## Microsoft Viva Learning

Viva Learning brings learning to the forefront in Microsoft Teams. It empowers people to discover, share, assign and learn wherever it best suits them, making it part of their daily routine.

## Supporting You

Employees want flexible remote working options, and meaningful in-person collaboration.

Empowering people to thrive in a flexible working world means rethinking everything, from how you empower managers and create a positive culture, through to delivering meaningful employee experiences.

This is where Microsoft Viva can help. An integrated employee experience platform built on top of Microsoft 365, Viva is accessed via Teams and SharePoint Online, supporting your peoples' needs through a digitally reimaged employee experience.

Discover how Microsoft Viva can help your people to be at their best and thrive in the next normal.

# Microsoft Viva - Discovery Workshops

To understand the full benefits of Microsoft Viva to your organisation, CPS will run individual Discovery Workshops with you, focusing on your business objectives and requirements.

## Microsoft Viva Connections

This workshop focuses on exploring company-wide communication and employee engagement scenarios enabled by Viva Connections. The following subjects will be covered:

- Connections overview
- SharePoint Online intranet
- Connections scenarios

The output is a roadmap outlining potential work packages, dependencies with clear next steps, and an adoption framework.

## Microsoft Viva Insights

This workshop focuses on employee experience scenarios enabled by Viva Insights for individuals, managers and leadership teams. The following subjects will be covered:

- Insights overview
- Employee experience
- Scenario deep dives

The output is a roadmap outlining potential work packages, dependencies with clear next steps, and an adoption framework.

## Microsoft Viva Topics

This workshop focuses on knowledge scenarios enabled by Viva Topics. The following subjects will be covered:

- Envision knowledge and content services scenarios
- Scenarios using Topics and SharePoint Syntex

The output is a roadmap outlining potential work packages, dependencies with clear next steps, and an adoption framework.

## Microsoft Viva Learning

This workshop focuses on learning scenarios enabled by Viva Learning. The following subjects will be covered:

- Learning overview
- Integration with 3rd party LMS
- Scenario overviews

The output is a roadmap outlining potential work packages, dependencies with clear next steps, and an adoption framework.
