

Produce purpose-built applications and leverage your existing data & information

Microsoft's Power Platform is a new offering which incorporates a number of tools to create a platform for not only producing purpose built applications but also leveraging data and information from other Microsoft tools such as Office 365 including Power BI and Microsoft Flow and also Dynamics 365.

The main component of this Platform is Microsoft PowerApps which is a tool to help organisations build applications quickly and easily in a matter of hours. This tool helps you create bespoke apps, therefore

reducing the need for third party applications. It also has the capability of connecting to custom and legacy systems, whilst integrating seamlessly with the other tools in your environment.

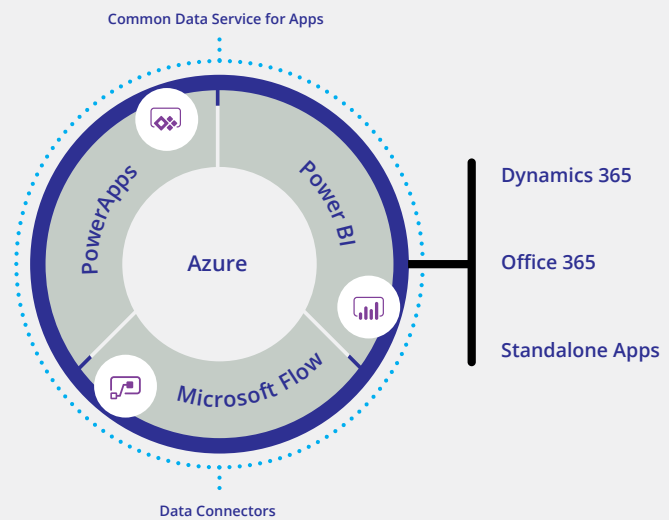

70% Reduced application development cost and effort

38% reduction in ongoing application management and maintenance effort

122,850 worker hours saved from streamlined and automated business processes

Forrester TEI 2018

USE CASES FOR POWERAPPS

Internal Resource Management

Sickness logging
