

You're an individual, you're working in a team, you manage a team, or you run the company. Any way you look at it, you work on multiple tasks.

Traditionally, project management tools have provided visibility across programmes and projects, enabling summarised reporting and dashboards. Yet this structured work only accounts for a small percentage of the total work being delivered across a business.

Work - it means different things to organisations, teams and individuals. A Project Manager delivering a large project will often see work as the core effort to deliver their plan with tasks and milestones; while for HR or

Procurement, work is primarily their core day to day activities alongside other managed work they are collaborating on.

DO YOU KNOW?

What tasks are being worked on?

Who the work is assigned to?

When the work will complete?

The level of risk present in all the work?

How much it all costs?

In today's world, tasks appear from a variety of systems:

Microsoft Planner | Project for the web | Project Online | Azure Boards (DevOps)

CPS workhub enables the surfacing of managed work; helping individuals, team leaders and executives to understand the delivery of work across the business.

BENEFITS

1. Review work across tools
2. Support governance structures
3. Be empowered to assist them with workload management.

GET VALUE FROM WORKHUB

Only using Planner and/or Azure DevOps? workhub can work for you:

1. Roll up data across all your Planner / Azure Boards
2. Delivers out of the box dashboards and reports
3. Understand the status and make decisions on current information
4. Add Project for the web / Project Online in the future.

WORKHUB CAN UTILISE

Microsoft Planner

Project for the web
Project Online

Azure DevOps

Power BI

Microsoft Teams

Fully integrated, using Microsoft 365 and Power Platform capabilities, workhub is available via Teams, with the workhub App pulling together the best capabilities of work management tools including Planner, Project for the web, Project Online, Azure DevOps and Power BI. This hand in hand approach allows the solution to be tailored to your specific business requirements.
