

MAKING PROJECT MANAGEMENT EASIER WITH PROJECT FOR THE WEB

As the pace of organisational change quickens, it is more common for people outside the traditional Project Management community to manage projects. While individuals and teams may not require a mature project management system, providing easy to use tools to support them improves delivery efficiency. Project Managers still need to create and share plans, and organisations need full visibility to support decision making.

A Straightforward Solution

Project for the web is an intuitive scheduling solution that provides simple, powerful work management capabilities. Quick and easy to use, anyone within your organisation can improve their project management processes to plan and manage work on any scale.

Work the way you want and get the results you need

Fresh new experience 

Start fast and use a variety of approaches and familiar Office tools to get more done

Collaboration made easy 

Enable team members to collaborate on tasks simultaneously, and use Project for the web with Microsoft Teams

Innovation platform 

Build on Microsoft's Power Platform, Project for the web natively integrates with Power Apps, Power Automate and Power BI.

Key features and benefits at a glance

- Quick to deploy and easy to use
- Simple to embed in Teams and SharePoint
- List, task, board and timeline (Gantt) views
- Reporting Packs available for Power BI
- Built on the Power Platform
- Power Platform Solution Accelerators available

Powerful Project Reporting

Project for the web is built on the Microsoft Power Platform which enables you to build all the reports you need and create ad-hoc analysis, live dashboards and interactive reports that are easy to consume on the web and across mobile devices.

Extend Project for the web with the Power Platform

There are several options available to enable Project for the web extensibility. You can add entities using the Power Platform. In addition, Power Apps and Power Automate provide powerful tools to build custom applications and workflows.

License Summary

Project for the web schedules are shareable across Microsoft 365 users with an E3 or E5 license. To update Project for the web schedules, the following licenses are required:

Function	Project Plan 1	Project Plan 3	Project Plan 5
Access Project Home	✓	✓	✓
Project for the web (Create, Edit, View)	✓	✓	✓
Project Roadmap (Create, Edit, View)		✓	✓
Project for the web Solution (Create, Edit, View)		✓	✓

You should also consider requirement for other licenses based on use case for resources (ie Power BI Professional for reporting; Power Automate for workflow etc)
